William T. Ziemba, Donald B. Hausch : Beat the Racetrack before purchasing it in order to gauge whether or not it would be worth my time, and all praised Beat the Racetrack:

8 of 8 people found the following review helpful. Ziemba present the facts for a case a lot of people refuse to believe. By John Hopkins Ziemba's book is thorough and convincing my initial trials of the system show that even today it can be effective in "beating the market" it is clearly written and elucidated, however college level mathematics knowledge makes it easily accessible, to people without tertiary level maths may find it hard going. I personally thoroughly congratulate Dr Z and love his work! 3 of 4 people found the following review helpful. The book to get for betting. By Luke Stortzum Exactly what I was looking for in terms of material and insight. It has helped me quickly understand the intricacies of betting. 14 of 14 people found the following review helpful. Track Classic. By Fred Corsiglia War Peace, Wuthering Heights, Beat the Racetrack... a list of classic books. Beat the Racetrack reviews market inefficiencies associated with place and show betting. Empirical formulas for evaluating inefficiency and sizing bets are given. Guidelines for conditions where bets are not recommended are made. The book reviews similar studies by other statisticians and refines their work. This book really does not detail how to select winners or bet in exotic pools. The book specializes in place and show betting. Watch out that you either receive the detachable charts in the back of the book or you will need to program some quadratic formulas. This title routinely sells for multiples of the list price.
