Philip Riley, Laura Taalman : Beyond Sudoku before purchasing it in order to gage whether or not it would be worth my time, and all praised Beyond Sudoku:

3 of 3 people found the following review helpful. I need more Sudoku like this!By twila.write.rightReally enjoyed this assortment of Sudoku variations with color features. If you get bored with the standard 1-through-9 number puzzles -- if you did better at geometry in school than with algebra -- if you color-code your filing system -- these may intrigue and challenge you too.BTW, I'm not sayin' you had to do well in math -- just that this sort of puzzle involving colors and shapes is especially well-suited to the right-brained.And, BTW, I used highlighter pens to enhance the lines on the diagonal and zigzag puzzles -- good for older eyes, or if you do puzzles in low light.Finally, a plea to Sudoku constructors and publishers -- MORE VARIATIONS, MORE VARIATIONS!Thank you to Philip Riley and Laura Taalman for their contributions!1 of 1 people found the following review helpful. Appreciate that besides the fun Sudoku puzzlesBy angelluvAppreciate that besides the fun Sudoku puzzles, the size of the boxes are large enough to easily make legible notes. Puzzles are challenging enough to provide hours of fun!0 of 0 people found the following review helpful. Bought the book several years ago and really enjoyed the challengesBy Movie loverBought the book several years ago and really enjoyed the challenges. So I bought it again because who can remember every move and I wanted to enjoy the challenges again.

Ready to take your sudoku skills to the next level? Beyond Sudoku features more than 150 ingenious puzzles with extra regions indicated by colored squares or colored dotted lines. The play of patterns and colors makes each grid a

unique work of art, and there's only one new rule: no numbers may repeat in the extra regions. But that simple rule takes you Beyond Sudoku to a new world of challenges and fun!
