The titles tell you where the verses can be found, which may be too much of a giveaway if youve memorized a lot of scripture. There arent any letter hints in the back of the book as there are in most cryptogram books, but theres a hint to the subject matter on the bottom of each page. For example, The device that stands, and Corruption. I generally prefer to have the letter hint for emergencies (i.e. when Im brain dead), however these cryptograms are fairly easy to figure out without cheating. Theres plenty of white space for solving, and probably a little too much wasted space on each page. The book is a full 8 x 11 and would have easily worked in a smaller size.So, the reason I gave it 4 stars instead of 5 was because I think the verse references should have also been encrypted to make the puzzles a little more challenging, there should have been letter

hints in the back of the book and not subject hints at the bottom of the page, and there was too much wasted space. But verse selection is nice and it seems to be well-edited (I didn't find any errors). 0 of 0 people found the following review helpful. Highly recommend the book and the seller. By Sue M. I love doing these cryptograms. You not only get the satisfaction of solving a puzzle, but also a Bible verse to think about! 1 of 1 people found the following review helpful. Very good cryptogram book. By Dave E. Very good book...takes a little getting used to it...as you have to remember it's King James...thee..thou,hath, ye and o'once you do it's less confusing...wish the clue at the bottom was smaller and hidden a bit...I try not to look down at it as it can make the quote easier to figure out..good space above to write answers. Not a difficult book... I would buy it again and recommend it

These cryptograms are verses from the King James version of the Bible. There are 113 pages of Bible cryptograms. Each page has one Bible cryptogram written across five lines, with plenty of space between lines for large handwriting. The Bible cryptograms are written in large letters with a monospaced font, so that each letter has the same width. A hint at the bottom of each page is provided in case you need a little help.
