Roger von Oech : Big Ball of Whacks before purchasing it in order to gage whether or not it would be worth my time, and all praised Big Ball of Whacks:

Twice as big (by volume) + 2 new shaped-pieces!By Roger von OechIf you liked the classic Ball of Whacks, you'll love the new Big Ball of Whacks. It's the same basic shape as its forerunner -- the 30-sided rhombic triacontahedron -- but it's twice as big (by volume) and has two new-shaped pieces (flat whacks and half whacks) that lead to greater playability.The 96-page guidebook provides tips for you to use it in a creative workshop.I enjoyed designing and creating this product, and I believe you'll have many hours of fun exploring the many shapes you'll be able to create with it. (I'm the product creator.)

The Big Ball of Whacks introduces several exciting new design features. Bigger than the original, award-winning Ball of Whacks, it has 192 rare earth magnets inside so it looks and feels hefty in your hand! The 36 magnetic design pieces include two entirely new pyramid-shaped elements. There are 24 Whack pieces, six Half-Whack pieces, and six flat Whack pieces. This complex structure presents a greater challenge in reconstructing the Ball shape. It also opens up far more hands-on creative options as you design your own shapes. Includes 96-page Guidebook The Big Ball Of Whacks is also available as a multi-color version, which makes an intriguing brainteaser puzzle.
