Binary Puzzle (also known as Binairo, Takuzu, Tohu wa Vohu, Binoxxo) is played on a rectangular or square grid.

The goal is to fill in the grid with digits 0 and 1 according to the following rules: There are as many digits 1 as digits 0 in every row and every column (or one more for odd sized grids). No more than two cells in a row can contain the same number. Each row is unique, and each column is unique.
