Joanne O'Sullivan : Bizarre Weather: Howling Winds, Pouring Rain, Blazing Heat, Freezing Cold, Hurricanes, Earthquakes, Tsunamis, Tornadoes, and More of Nature's Fury before purchasing it in order to gage whether or not it would be worth my time, and all praised Bizarre Weather: Howling Winds, Pouring Rain, Blazing Heat, Freezing Cold, Hurricanes, Earthquakes, Tsunamis, Tornadoes, and More of Nature's Fury:

0 of 0 people found the following review helpful. Excellent, information packed weather book.....By Bob WalchThis is an excellent book on weather for teenagers and adults. It is not too technical but not basic either. The individual sections are composed of short 3-5 paragraph explanations about the various types of "strange weather" the author discusses. There is a lot in this book so it will take time to absorb it all but it can be read at various speeds depending on the reader. It will be an excellent resource too. Librarians make sure to get at least one copy for your collection and

home school parents will want a copy too!

This is weather beyond your wildest imagination yet it's all true: showers of worms from the sky, watermelon snow, gory storms, and other freakish and fun phenomena! These stories are anything but ordinary, and they will leave you stunned, horrified, amazed, and sometimes even amused at the incredible things nature can do. Gathered from historic records, present-day news reports and research studies, and spanning the globe from the Sahara to the tundra to the USA, they reveal just how volatile and bizarre weather can be. Find out about supersized hailstones as big as bowling balls; fish raining from the sky; the never-ending lightning that has become a UNESCO National Heritage Site; and fog so thick it killed hundreds of people in a single day. And if that isn't strange enough for you, there are terrible typhoons and tsunamis, tornadoes that have carried people into the air, temperatures that soared over 49 degrees in two minutes, and even cyclones that have raised ships buried for over a century. Scientists can explain how and why some of these things happen but other events remain a mystery.

About the Author Joanne O'Sullivan is the author of 101 PLACES YOU GOTTA SEE BEFORE YOU'RE 12!, 101 THINGS YOU GOTTA DO BEFORE YOU'RE 12, and 101 WAYS YOU CAN HELP SAVE THE PLANET BEFORE YOU'RE 12, as well as many titles for adults including, BOOK OF LEGAL STUFF and BOOK OF SUPERSTITIOUS STUFF for the Imagine Publishing'. She and her children spend many happy hours exploring the wonders of the natural world.
