**From Perigee Trade : Break the dealer: winning strategies for today's blackjack by Jerry L. Patterson (1986-09-30)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Break the dealer: winning strategies for today's blackjack by Jerry L. Patterson (1986-09-30):

2 of 2 people found the following review helpful. "The First Book To Describe Biases Table Selection".By M. MaribaThis is a classic book that describes biases that occur in Blackjack (BJ) tables leading to either players winning or losing titled "Break The Dealer" by the legendary BJ player author Jerry L. Patterson. He was the first BJ expert to have noted the ineffectiveness of "Card Counting" once casinos introduced changes/countermeasures to the BJ games [After a wide acknowledgement by BJ experts "Casino Establishments" that concepts described by an earlier classical book "Beat The Dealer", were very effective against the then prevalent BJ games (single double deck games)!]. He identified "winning factors" that point to tables were players are likely to win. These "winning factors" as known as TARGET (TAbble, Research, Grading Evaluation Technique) factors that are used for table selection : table entry (when present = player-biased tables or dealer-breaking tables) departure (when absent = casino-biased tables). But the book contains much more valuable information than TARGET factors including money management other casino tips! The book is a classic old but still very relevant today in the era of predominately Multiple-Deck Games Shuffling Machines. A recommended reading by legendary author, Jerry L. Patterson who has been teaching his students BJ (Jerry Patterson Blackjack Clinic) since 1977.Ps. Having visited Las Vegas in 2010 (two weeks), 2012 (two weeks) and 2013 (three weeks) and playing Blackjack both on the Strip and Downtown (both single, double and multi-deck

games), I'm still amazed at the relevance of this grossly underrated book in 2013 (luckily I even have the updated version of TARGET, named TARGET 21 Plus booklet)! Had a great time playing myself at winning/'dumping tables' at Harrahs, Wynn, Circus Circus, NY NY, Mandalay Bay, Rio, Palms, Riviera and Hooters casinos. I also understand fully well why a dealer may stand alone without a game in a relatively full casino (bad game). Highly recommended book if you care about your money. 2 of 2 people found the following review helpful. When to sit down and when to leave a table By John H. While somewhat dated, this book still contains very valuable information and strategies that are hard to find information about. It was one of the first books to offer a system to counteract the ways the cards are shuffled and "washed." Includes table selection methods and suggestions players can use to CREATE a favorable game. My favorite sections are the chapters on "Casino Tips and Strategies" and "Money Management." Highly recommended.
