The US system is 15-17 HCPs. This was not mentioned in the advertised description. This makes the book less relevant for a US audience.The book is more helpful in the second half where suit contracts are discussed.Charley3 of 3 people found the following review helpful. Good value for moneyBy Trees BitmapI love the 4 e-books of Andrew Robson. They're good value for

money. Every chapter has a short lesson and shows you a hand in which the lesson is used. I'm a beginner at bridge. I played the hand first for myself and after that I read how Andrew Robson would've done it. It's very nice to read how a more experienced bridge player than me would solve the problem to make the contract. I learned a lot from it. 2 of 2 people found the following review helpful. Opening Leads By Larry E. Manter This book is valuable not only in the examples it uses but primarily because it causes you to think in depth about this extremely important aspect of opening leads. The fact that it's pretty basic and doesn't cover the subject in depth certainly does NOT mean that it's not quite worthwhile.

In a compelling format, each page contains a lesson and an illustrative deal. Not only will you further your understanding of the specific topic, you will also learn more about the beauty of the game in general.
