Stacy McAnulty : The Dino Files #2: Too Big to Hide before purchasing it in order to gage whether or not it would be worth my time, and all praised The Dino Files #2: Too Big to Hide:

0 of 0 people found the following review helpful. Great chapter book!By nice27Great book. My 2nd graders loved it. The author even signed our copy during April is for authors event. Wonderful eries. Strongly recommend to 6-9 year olds.0 of 0 people found the following review helpful. Five StarsBy jmpGreat book for beginner readers0 of 0 people found the following review helpful. 7-year-old loved itBy LMGWarning: spoiler alerts! From my 7-year-old, who had finished reading the book before I even woke up this morning: "I like when they find the giant fossil that is 100 times bigger than Peanut's horn, and I like when they find out Mary has a dinosaur!"

How do you hide a pet dinosaur? Taking care of a baby dinosaur is hard work. And its even harder when you cant tell anyone about him! Frank and Sam are good at feeding, cleaning, and walking Peanut. But their grandma has found a new fossil and it looks just like Peanuts horn . . . only a thousand times bigger! Will baby Peanut grow to be that huge, too? How do you hide a dinosaur when he becomes as big as a house? It wont be easy. Especially when scientists come to the dig site to make a movie about the new fossil. The hilarious Dino Files chapter book series follows a nine-year-old dinosaur expert, his paleontologist grandparents, a cat named Saurus, and fossils that might not be so extinct!

About the Author Stacy McAnulty does not have a dinosaur. She does have three kids, two dogs, and one husband. She has been on a dinosaur dig in Wyoming, where she found a small fossil. It wasnt an egg. Stacy grew up in upstate New York but now calls North Carolina home. (She still really wants a dinosaur maybe an Iguanodon.)
