Since each puzzle has only 17 initial values, I suspect the easy ones might deter a beginner, although they can be solved with simple techniques and a bit of patience. The last third of the book consists of "Torturous" puzzles that requires some advanced techniques and lots of coffee. The puzzles are printed six to an 8" by 10" page and each puzzle is 2-7/8" wide by 2-5/8" tall with a 10 point bold font. This leaves little room for candidates and notes outside the puzzle. It is my only reason for a less than perfect score. The pages are bound with a glue back spine, which allows for easy removal of a page. I am ordering this book again and looking for other Bloom Sudoku books.

My biggest problem is each page contains six puzzles and they are so small it's very hard to write in candidates when needed to solve more challenging puzzles. To overcome that, I have printed out my own blank grids and just transfer the puzzle over to those grids. Easy puzzles can usually be solved with elimination techniques while the harder ones require more advanced solving techniques such as x-wing, xy-wing, gordonian rectangles, etc. This book is loaded with Sudoku puzzles and with almost 50% of the book being tough, nail biting and torturous levels, even the more advanced puzzlers will find plenty of puzzles to solve. If your household is like mine with puzzlers having different solving skills, this book is a great one to leave around for the whole family. Just tuck a few blank grids in the back of the book for those needing a larger grid.

My first sudoku book was difficult at the biginning as it was my first book and I figured the puzzles really quick so I decided to get a new challenging book. I searched on and found some and I liked the title of this one. I decided to get and yup I made the right choice. I looked at some of the puzzles from easy to average to challenging to nail biting to torturous and the nail biting and the torturous ones were difficult to me and that's basically what I was looking for. I enjoy solving difficult puzzles as I feel more challenged.

Never before has such a huge collection of Sudoku puzzles been published in a single book. The Gigantic Sudoku Puzzle Book has 1500 sudoku puzzles spread across 6 levels of difficulty. All the puzzles are on a standard 81 square, 9X9 grid. The solutions to ALL 1500 puzzles are included at the back of the book. The levels are: easy, average, challenging, tough, nail biting and torturous. Each level has around 250 puzzles which increase in difficulty as you turn each page. At the end of each level, I have included 6 empty grids for scribbling and calculating. The easy puzzles will take a couple of minutes to complete. The average and challenging puzzles need a bit more brainpower, while the tough and nail biting will have you scratching your head and biting your pencil. As for the torturous ones - don't say I didn't warn you. You may need every trick in the book and possibly some divine inspiration to solve the toughest of these. The BUYSUDOKUBOOKS.COM Guarantee Often you find sudoku books with puzzles that have more than one solution. This can waste a lot of time and drain a fair amount of ones sanity when it comes to solving a puzzle. But have no fear, to ensure minimum frustration, every puzzle in this book has been carefully checked and is guaranteed to have only one solution.

I am a puzzle nut , so when I first got the book as a present , I was hoping for a challenge ,and BOY did I get one ! I also appreciated the extra space for workings. Level 6 is crazy so be warned ! --Marty Greuben

From the Author Don't you just love Sudoku puzzles? Once you start a Sudoku book, do you find you just cant put it down? Does your blood start boiling when you just can't solve the next square? Do you hate it when you discover that a puzzle has more than one solution? If you answered yes to these questions, then this is the book for you. It has puzzles ranging from extremely easy to absolutely torturous. Every grid is guaranteed to have only one solution, so it's worth struggling to get to the end of every puzzle. And with 1500 puzzles, you can play for hours and hours without the fear of running out when you least expect it. You can keep going for an hour a day for months on end.

About the Author I was born in South Africa in 1973. I studied a variety of courses at university including science, business and jewelry design. My first job was in the jewelry industry. Soon after getting married in 1996, I moved from employee to employer and started my own internet/web design company. I sold my company a few years later and stayed in the internet industry for a number of years. I was fortunate to gain experience in many areas, from design, branding and marketing to sales, e-commerce and gaming. In 2003 after the bubble burst, I decided to shift industries and get some new business experience, and purchased a Minuteman Press printing franchise. In 2008, after some agonising deliberations, we decided to leave South Africa. South Africa is a beautiful country with a lot of potential (and quite a few problems) and it was a very difficult decision to leave. But we wanted our three children to grow up in a first world country, in a more secure and free environment. So I sold my printing business and we moved to Israel. We have been here for over two years and I am happy to say that it has been the best decision our family has ever made. As an untreated puzzles 'addict', I spend many hours thriving in the challenge of solving complicated sudoku puzzles. Sudokus' distinct advantage over other mathematical games/puzzles is its reliance on using logical reasoning and deduction to solve numeracy puzzles, without requiring mathematical calculations. I love spending time with my kids having fun and learning together, So I combined this with my puzzle addiction to create Sudokids - Sudoku Puzzles for children as

well as numerous adult Sudoku books.
