**The Lumineers : The Lumineers** before purchasing it in order to gage whether or not it would be worth my time, and all praised The Lumineers:

3 of 3 people found the following review helpful. good quality transcription, good for moderate skill levelBy Brian D.I have played piano for almost 30 years, but not many lessons, so on a scale of 1 to 10 I'd say my skill level is around a 5. This book is probably about a 4 on that scale. I was able to sit down and start enjoying songs immediately. Some of the songs work great on piano alone, others really need a rhythm instrument to be added to the mix to reproduce the original sound. If you like the band, you'll love the book.0 of 0 people found the following review helpful. Okay but not greatBy LarryThis review is for the Kindle version. It's okay for giving you an idea on how to play the songs, but the music and tablature is hard to read on my Kindle App.3 of 3 people found the following review helpful.
