David Braverman : The Mathematics of the Gregorian Calendar before purchasing it in order to gage whether or not it would be worth my time, and all praised The Mathematics of the Gregorian Calendar:

About the Author I was born in the Bronx on May 28, 1945. I went to high school at James Monroe High School and then went to the State University of New York at Stony Brook from which I graduated with a Bachelor of Science in mathematics in 1967. I immediately began my teaching career which lasted over 33 years. During that time, I earned a Master of Arts degree in mathematics. I hope to share my knowledge of mathematics with others as I did for 33 years as a teacher. I retired in 2000 and only recently, I found my new calling in 2009: writing.
