Hedges This three CD audio edition of "The Mighty Boosh" BBC radio series is a treasure. While I prefer the more refined comedy of the "Boosh" television series, this is a great way to have a laugh on the go (it was put on my iPod with great haste). As always, Noel Fielding and Julian Barratt dish up surreal humor in six episodes for the BBC. Those familiar with the television series will no doubt recognize many of the same episodes ("Jungle", "Hitcher", "Mutants", "Tundra", etc.) although in frequently highly modified form in both plotline and detail (the zoo is "Fossil's Fun World" instead of "The Zooniverse," for example). The "Tundra" and "Jungle" episodes are my two favorites of the set, but all are excellent and bizarre. The shows are hilarious and a bit more raw than their television counterparts, but always provide the edgy, off-kilter humor "The Mighty Boosh" is deservedly famous for. This set is comic genius. 0 of 0 people found the following review helpful. Mighty Boosh CD's Great For Fans Of The Show By Chris Porter My son introduced me to The Mighty Boosh last year, knowing that I am a fan of British Comedy. After

watching the episodes on Adult Swim, we bought the DVD's, The Mighty Book Of The Boosh, and the CD's. Each item gives you a little bit more than you get on the show, but not much that is new. In fact, the CD's are from recordings that were made on BBC Radio, and are the seeds that become the show in later years. Much like the show, the CD's have similar story lines to the first season and include all of the major characters and songs, but also has some unique twists and turns as well. If you like the show, you will enjoy the CD's also. My son and I both feel it is worth having, but don't expect a ton of unique story lines. Good fun. 2 of 2 people found the following review helpful.

Mighty Boosh BBC Radio Series
By angiei was so happy to get this product! =] i listen to it constantly and its quite funny to listen to it, and then watch the series on DVD because you recognize the jokes and see them in a different way, they are used very differently on the radio show so its interesting to hear the jokes in a new way. This is a must have for any fan or follower of the show.

(Six Episodes) Welcome to the surreal world of Zooniverse where two zookeepers, Howard Moon (Julian Barratt) and Vince Noir (Noel Fielding), embark on an array of magical and bizarre adventures that include a trip to the Arctic tundra to find a lost egg, an expedition deep into the jungle, and being trapped inside a hitchhikers box.
