Ivan Moscovich : The Monty Hall Problem and Other Puzzles (Mastermind) before purchasing it in order to gage whether or not it would be worth my time, and all praised The Monty Hall Problem and Other Puzzles (Mastermind):

Puzzlers will feel fit to be tied - Dog Tied: If Fido is tied to a 10-foot-long rope, and his bone is 15 feet away, how is it possible that he can reach and enjoy his bone without breaking or stretching the rope? (And yes - the rope IS tied to something.) There's fun in finding the answer to this and other cool number-based problems. Dust off your mathematics and get solving. The intriguing enigmas include questions on interstellar communications, ancient geometry (Pythagoras and Plato), and even traffic patterns in "gridlock city." Or play the grasshopper jumping game. It's all fascinating.

About the Author Ivan Moscovich lives in Amsterdam where he owns and runs a workshop creating puzzles and toys. He is the author of *The Awesome 3-D Puzzle Challenge* (Sterling, 1402707096).
