ThompsonThis is a great copy of the nine symphonies. I have been reading and listening to it (on a separate CD) a lot since I got them. The biggest convenience is that it has an arrow pointing to the main theme in each section. At first that might sound annoying but it's actually kind of nice.0 of 0 people found the following review helpful. Great Way to Enjoy BeethovenBy Jay MeeAll in one volume, the nine symphonies are clearly laid out for reading along while listening to a cd. Study Beethoven's talent and compare different interpretations.

With an entirely original system of signals for identifying themes as they appear, are developed and recur, making reading of scores simple for everyone who can follow ordinary instrumental or vocal music.
